Interagency Deliberative – not for release outside of the federal government

Hello pesticides ESA team,

Attached is a start of an updated interagency activities tracker that is meant to summarize upcoming major milestones and stakeholder meetings that will help in our overall planning.

We included known deadlines for EPA's BEs and stakeholder meetings. Please add relevant information for your agency. There are a number of blank rows at the top of the table for you to add your information. Please add rows as needed. I will then compile all the input and put them in chronological order. The timeframe is FY20 and beyond.

I know it's the holidays, so is two weeks sufficient amount of time to provide input? If folks are on leave, then it can wait to the new year if needed.

I will add this as a topic of discussion at our next managers meeting. In the meantime, please feel free to email me any questions.

Thanks

Brian
